

'BET BIGGER SPANISH 21' TABLE GAME

Object of the game:

The main objective of ***Bet Bigger Spanish 21*** is to come as close to 21 as possible without going over and to have a 'hand' that has a total value greater than the total value of the dealer's hand. If the total value of a player's 'hand' exceeds 21, the player 'busts' or loses the game.

Rules of the game:

At the first opening of the day of any ***Bet Bigger Spanish 21*** game, the dealer shall spread each deck of cards out on the table to ensure all cards are present. The game may be played with two, six, or eight decks. Each deck of cards will have all '10' cards removed. The dealer will verify each decks of cards is complete. After each deck is verified, the dealer will wash all decks of cards together and form one pile or 'brick'.

The dealer will shuffle the cards at the beginning of the day or after the 'cut card' is dealt during game play. When the dealer has completed shuffling, they will form a 'brick' with the cards.

The dealer will then give a 'cut card' to any player at the table and ask them to 'cut' the brick by placing the card in any point in the brick, so long as that point is at least one deck (approximately) from the front or back of the brick. Once the player places cut card in the brick, the dealer will take the remaining cards from the back of the brick and put them in the front. Then, the dealer will place the cut card into the back of the brick approximately one deck from the last card.

The game will begin with player(s) placing, at minimum, a bet in the 'ante' bet position. A player's bet must equal, at minimum, the table's posted 'minimum bet' and may not exceed ten-dollars (\$10). Players may also, in their sole discretion, place bets in the 'Bet Bigger 2x', 'Bet Bigger 3x', 'Bet Bigger 4x', 'Match the Dealer - Up Card', 'Lucky Ladies' or 'Match the Dealer - Down Card' bet positions (the 'Bonus Bets'). Bets placed in the 'Bet Bigger 2x', 'Bet Bigger 3x', and 'Bet Bigger 4x' spots must match the bet placed in the 'ante' bet position. Bets placed in the 'Match the Dealer - Up Card', 'Lucky Ladies' or 'Match the Dealer - Down Card' spots must be for at least half of the posted table minimum bet and may not exceed ten-dollars (\$10).

The game will be dealt from left to right, with each player and the dealer receiving one card at a time, until all players and the dealer have two cards. The dealer will receive its first card face up and its second card face down.

Any player who placed a 'Lucky Ladies' bet and who is dealt a winning 'Lucky Ladies' hand based on the 'Lucky Ladies' pay table herein, will be paid the odds for their hand. 'Lucky Ladies' hands are based on the player's first two cards. The dealer will take the

bet of any player who placed a 'Lucky Ladies' bet and whose hand is not a winning 'Lucky Ladies' hand.

Any player who placed a 'Match the Dealer - Up Card' bet and who is dealt a winning 'Match the Dealer - Up Card' hand based on the 'Match the Dealer' pay table herein, will be paid the odds for their hand. 'Match the Dealer - Up Card' hands are based on the player's first two cards and the dealer's 'face up' card. The dealer will take the bet of any player who placed a 'Match the Dealer - Up Card' bet and whose hand is not a winning 'Match the Dealer - Up Card' hand.

If a player's first two (2) cards consist of an ace **and** ten/face card, the player has 'blackjack'. Regardless of the dealer's hand, the player shall be paid 3:2 for their ante bet; Bet Bigger 2x, if played; Bet Bigger 3x, if played; and Bet Bigger 4x, if played.

If the dealer's face up card is a ten/face card, the dealer will check their face down card to determine if it is an ace. If the dealer's face down card is an ace, the dealer has 'blackjack' and will immediately turn over their face down card to reveal it to the players. The dealer shall then take the bets of any players who do not have 'blackjack'.

If the dealer's face up card is an ace, the dealer shall audibly ask the player(s) if they would like 'insurance'. Players may insure their hand(s) up to half their ante, Bet Bigger 2x, Bet Bigger 3x, and Bet Bigger 4x bets. Players must insure each bet (ante, Bet Bigger 2x, if played; Bet Bigger 3x, if played; and Bet Bigger 4x, if played) equally if they choose to take 'insurance'. The dealer will close the 'insurance' offer by waving their hand over the table. No more insurance bets may be placed after this action by the dealer.

After closing the 'insurance offer', the dealer will check their face down card to determine if it is a ten/face card. If the dealer's face down card is a ten/face, the dealer has 'blackjack' and will immediately turn over their face down card to reveal it to the players. The dealer shall then take the bets of any players who do not have 'blackjack'. The player's who placed an 'insurance' bet will receive 2:1 for each of their insurance bets.

If the dealer does not have 'blackjack', player action will begin from dealer's left to right. Each player has the right to 1) 'hit' by tapping the table, 2) 'stay' by waving their hand over their bet, 3) 'double down' by placing a bet equal to or less than their ante bet; Bet Bigger 2x, if played; Bet Bigger 3x, if played; and Bet Bigger 4x, if played; to the left of each respective bet, 4) 'split' by raising their index and middle fingers in the shape of a 'V' and displaying the hand signal over their bet, and by placing a bet equal to their ante bet; Bet Bigger 2x, if played; Bet Bigger 3x, if played; and Bet Bigger 4x, if played; to the left of each respective bet.

If a player 'hits' as described above, the dealer will deal the player an additional card.

If the player 'stays' as described above, the player's hand will remain as it stands and the dealer will move to the next player. After the player 'stays' the value of their hand shall be final.

If the player 'doubles down' as described above, the dealer will deal the player one additional card. A player may 'double down' multiple times on a single hand.

If the player 'splits' as described above, the dealer will separate the cards and ask for the player's action beginning with the left 'hand'. A player may only split matching cards. For this purpose, 'matching cards' shall mean cards of the same 'value'. For this purpose, 'value' shall mean the number or letter printed on the face of the card (ie 10 or Q). Players may split up to three times and play up to a four hand total. If a player splits aces, they may only receive one additional card per ace. A player may not re-split aces.

If, at any time, a player's hand's total value exceeds 21 (twenty-one), the player has lost and their 'hand' is removed from play, except that their first two cards are still eligible for the '**Match The Dealer - Down Card**' bet, if played. The dealer shall immediately 1) take the losing player's bet and 2) take the losing player's cards and place them in the discard holder, unless the player has a wager on the '**Match The Dealer - Down Card**' bet spot.

If, at any time, a player's hand has a total value of exactly 21 (twenty-one), the player shall be paid even money, unless their hand qualifies for the '**Bonus 21**' payouts described herein, for their ante bet; Bet Bigger 2x, if played; Bet Bigger 3x, if played; and Bet Bigger 4x, if played. If the player's hand has a total value of exactly 21 (twenty-one) and is comprised of cards listed on the '**Bonus 21**' pay table herein, the player shall be paid the odds based on the '**Bonus 21**' payable for their ante bet; Bet Bigger 2x, if played; Bet Bigger 3x, if played; and Bet Bigger 4x, if played.

The dealer will then 'turn over' their down card. Any player who placed a 'Match the Dealer - Down Card' bet and who is dealt a winning 'Match the Dealer - Down Card' hand based on the 'Match the Dealer' pay table herein, will be paid the odds for their hand. 'Match the Dealer - Up Card' hands are based on the player's first two cards and the dealer's 'face down' card. The dealer will take the bet of any player who placed a 'Match the Dealer - Down Card' bet and whose hand is not a winning 'Match the Dealer - Down Card' hand.

The dealer must 'hit' their 'hand' until the total value of their 'hand' is 17 (seventeen). If the dealer has a 'soft' 17 (seventeen), the dealer must hit until their hand is 'hard'. If, at anytime, the dealer's hand's total value exceeds 21 (twenty-one), the dealer has 'bust' and all players who have 'hands' remaining in play have 'won' their 'hand(s)' and shall be paid 1:1 on their ante bet; Bet Bigger 2x, if played; Bet Bigger 3x, if played; and Bet Bigger 4x, if played.

The 'ace' or 'A' card shall have a real value of 1 or 11. Any 'face' or 'J' or 'Q' or 'K' card shall have a real value of 10. All other cards shall have the value printed on them (ie: a '6' card equals a real value of 6.)

A single player may play multiple hands (spots) at one time provided the hands are adjacent, but must relinquish their second and subsequent 'spots' at the request of the house to make room for other players. The house shall, in its sole discretion, determine if a player shall be forced to relinquish their second and subsequent 'spots' and *shall not be required* to ask any player to do the same.

If the Primary Game Operator (PGO) suspects that a player is 'counting cards,' the PGO may 'flat bet' the player upon notifying the player that they are being 'flat bet.' For clarification, 'flat bet' shall mean that a player must bet the exact same bet(s) for the duration of the shoe as the bet(s) placed for their first hand of the shoe. For example, if a player placed a \$10 bet on the Ante, Bet Bigger 2x, and Bet Bigger 3x bet positions, he must place they exact same bets for the duration of the shoe so long as he wishes to play the game. He may not, for instance, add a bet on the Bet Bigger 3x and Bet Bigger 4x bet positions.

At anytime, the house may choose to close the table and will notify players by giving them notice that the game will end after the current 'shoe'. A 'shoe' ends when the dealer deals the 'cut card'.

The posted 'House Rules', as updated from time-to-time and approved by the New Hampshire Lottery Commission, shall be incorporated herein.

PAYOUT ODDS ON NEXT PAGE.**

Payout Odds:

Lucky Ladies Payout Odds:

Winning Hand	Payout (\$5 Bet)	Payout (\$10 Bet)
Three Queens of Hearts (based on dealer's up card and player's first two cards)	50% of posted MEGA jackpot at time of win.*	100% of posted MEGA jackpot at time of win.*
Three Queens Same Suit (other than hearts) (based on dealer's up card and player's first two cards)	50% of posted MAJOR jackpot at time of win.*	100% of posted MAJOR jackpot at time of win.*
Three Queens Same Color (based on dealer's up card and player's first two cards)	50% of posted MINOR jackpot at time of win.*	100% of posted MINOR jackpot at time of win.*
Any Three Queens (based on dealer's up card and player's first two cards)	\$250.00	\$500.00
Matched 20 (same rank & suit) (based on player's first two cards)	\$125.00	\$250.00
Suited 20 (based on player's first two cards)	\$50.00	\$100.00
Non-Suited 20 (based on player's first two cards)	\$20.00	\$40.00

*MEGA, MAJOR and MINOR jackpot values will be posted prominently at the gaming table. MEGA, MAJOR and MINOR jackpot values may be updated not more than once every twenty-four (24) hours and shall not be updated in the middle of any game play, except that if a player wins any one of the jackpots, the values may be updated following the payout of the win. If more than one player wins the MEGA, MAJOR or MINOR jackpots during the same hand, the respective jackpot shall be split amongst the multiple winners. A Player's winning hand shall receive the payout for **only** the highest possible Lucky Ladies Blackjack hand. The Lucky Ladies bet is a HOUSE-FUNDED wager, the same as any other Bet Bigger Spanish 21 wager. Prize amounts are set at the sole discretion of the Game Operator Employer and are not based in any way on past wagers.
