

Exhibit A

High Card Flush

High Card Flush is a suits-based game where the objective is to obtain multiple cards in the same suit (Flush). It's simple to learn, fun to play and includes multiple opportunities to win.

Equipment:

Standard Casino Table

High Card Flush felt layout with payout charts printed on felt

Standard 52 card decks

Cut card

Cash value gaming chips

How to Play:

Players begin by placing the Ante wager between \$1 and \$10 per betting spot and any optional side bets. If a player wants to play an optional side bet, it must be between \$1 and \$10. The player's optional bets must match in value. Next, the player and the dealer each receive seven cards. If the player has 2, 3 or 4 cards in their Flush they may raise 1x their Ante not betting more than \$10 per spot. If the player has five cards in their Flush, they may raise 2x their Ante not betting more than \$10 per spot. If the player has six or seven cards in their Flush, they may raise 3x their Ante not betting more than \$10 per spot. The best Flush hand wins and any side bets are reconciled.

Optional Side Bets:

Flush – Wins odds with a 4-card Flush or better in the player's hand. Straight Flush – Wins odds with a 3-card Straight Flush or better in the player's hand. These two bets must match in value if they are played between \$1 and \$10 per spot.

Pay Tables:

Flush	7 cards	200 to 1
