

New Hampshire Holdem Stud

Game Objective:

The objective New Hampshire Holdem is to compile the highest 5-card poker hand (containing at least a pair of sevens) from three dealt cards and two community cards.

The three card bonus bet is a separate pay table based on the three community cards in play.

Game Rules:

1. Dealers will shuffle a 52 card deck.
2. To begin the game, players must make an Ante bet. Optionally players may make a separate 3 card bonus bet.
3. Working from left to right, the dealer gives each player two starting cards, face-down.
4. The dealer places three community cards—face down—in the assigned area.
5. After looking at their two cards, players have a choice:
 - a. Fold (and surrender their ante); or
 - b. Make a 3rd street bet with optional raise and re-raise equal to their ante.
6. The dealer then reveals the first community card.
7. Players have a choice:
 - a. Fold (and surrender their ante and 3rd street bets); or
 - b. Make a 4th street bet with optional raise and re-raise equal to their ante.
8. The dealer then reveals the second community card.
9. Players have a choice:
 - a. Fold (and surrender their ante, 3rd street and 4th street bets); or
 - b. Make a 5th street bet with optional raise and re-raise equal to their ante.
10. The dealer then reveals the third community card.
11. Working from right to left the dealer will resolve all 3 card bonus bets based on the three community cards paying according to the posted paytable. Working from right to left again the dealer reveals each player's two-card starting hand and combines it with the three community cards.
12. The dealer pays according to the posted paytable. All winning bets receive the same odds payouts.

Equipment Used:

Standard Casino Gaming Table
New Hampshire Holdem Layout
Two separate distinguished decks of 52 cards
Discard rack
2 Cut Cards
Gaming chips of denominations of \$1, \$2, \$3, \$4, \$5, \$25

Method of Play:

New Hampshire Holdem is a five-card poker game. Players compete against a paytable, not against the dealer or other players.

Players ante and receive two cards. They either fold or buy the first community card (betting equal to their ante with an optional raise and re-raise equal to their ante). When that card is revealed, they either fold or buy the second community card (betting equal to their ante with an optional raise and re-raise equal to their ante). After that card is revealed, they either fold or buy the third and final community card (betting equal to their ante with an optional raise and re-raise equal to their ante).

Players need a pair of Jack's or better to win, and a pair of 6's to 10's to push. Odds printed on layout. All bets receive odds.

Types of Wagers:

Three identical bets on the betting circles

Wager Amounts:

\$2 minimum and \$10 maximum

Payout Table:

Royal Flush:	125 to 1
Straight Flush:	80 to 1
