

Stadium Blackjack Rules of Play

Stadium Blackjack is a variation of a blackjack game wherein each player places a wager on their own player terminal, and the results of the game are determined by a live dealer utilizing community cards to reconcile player decisions.

Rules of Play:

1. The dealer will begin the betting round by pressing "New Game" on the dealer terminal (DT) touch screen.
2. Each player places a wager on the main betting location, in addition to any side bets they wish during this betting window.
3. When the countdown timer expires, the dealer will deal one card on the layout to the 'Player' location, one to the 'Dealer' location, and a second card to the 'Player' location.
4. The players will then be able to make their decisions based on their two cards vs. the dealers' one card.
 - a. Each player terminal makes an independent decision on that hand.
5. After all player decisions have been made, the dealer terminal prompts the dealer to draw a card and place it in the 'Community' location on the layout.
 - a. For players that hit their original hand, this card becomes their hit card.
 - b. For Players that split their original hand, this card becomes the next card on the first split hand.
 - c. For players that Doubled Down, this card becomes their double down card.
 - d. For players that stood their original hand, this card becomes the dealers' second card.
6. For players who have split or hit, additional decisions continue and the dealer will draw cards as prompted to the 'Community' location on the layout until such time that all active player hands have been reconciled and the dealers' hand is completed.
7. The Dealer then presses "Confirm" to end the round. Pays and Takes are done automatically by the system.
8. Side bets are reconciled immediately on the players' first two cards (BTS and RM), and the King's Bounty bet is reconciled off the players' first two cards and the dealers' first two cards.
